SIEMENS

HiPath 3000 HiPath AllServe

Hicom 150 E/H

optiset E standard optiset E advance plus/comfort optiset E advance conference/conference

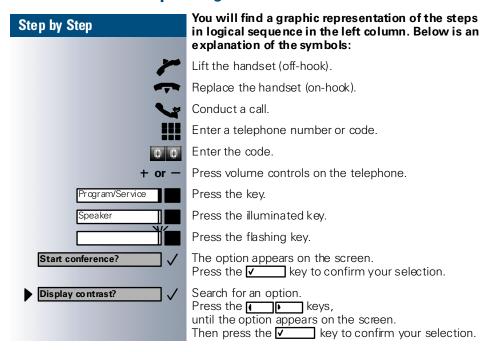

Before You Begin

These operating instructions describe the optiset E standard, optiset E advance plus/comfort and optiset E advance conference/conference telephones on your HiPath 3000/HiPath AllServe.

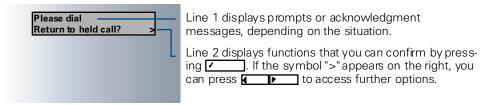

They describe all functions you can use from your telephone. You may find that some functions you wish to use are not available on your telephone. This may be due to one of the following reasons:

- The function has not been configured for your telephone address any questions to Customer Support.
- Your communications platform does not support this function contact your Siemens sales representative to upgrade your system.

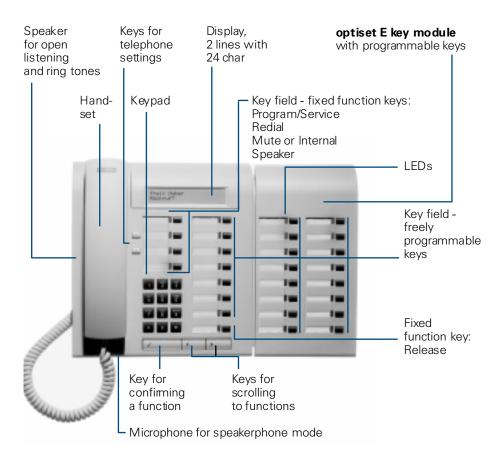

How to Use these Operating Instructions

Screen Displays

The optiset E standard, optiset E advance plus/comfort and optiset E advance conference/conference Telephones and Key Modules

Important Notes

Do not operate the telephone in environments where there is a danger of explosions.

Use only original Siemens accessories \Rightarrow page 97. Using other accessories may cause a hazard and will invalidate the warranty and the CE mark.

Never open the telephone or a key module. If you encounter any problems, contact System Support.

Never allow the telephone to come into contact with staining or aggressive liquids such as coffee, tea, juice, or soft drinks.

For information on telephone maintenance → page 99.

CE Mark

The device conforms to the EU guideline 1999/5/EG, as attested by the CE mark.

Environmental label

This device has been manufactured in accordance with our certified environmental management system (ISO 14001). This process ensures that energy consumption and the use of primary raw materials are kept to a minimum, thus reducing waste production.

Step by Step **Accessing Functions** ... Interactively You can select some functions while the telephone is idle, for example: Use ◀ to scroll to a function and press 🗸 Forwarding on to execute it You can select other functions directly depending on the situation. Example: you call a number, but the line is busy: Press 🖊 to confirm. Callback or Send message Use **■** 🕇 to scroll to a function and press 🗸 to execute it. ... Via the Program/Service Menu First press the "Program/Service" key. You then see a list of selection options, such as: "#0=Reset services" → page 68. Program/Service Press the key #0=Reset services? Use **■** 🗖 to scroll to a function and press 🔽 ┰┣ to execute it. Enter the code directly. The Quick-Reference Operating Instructions contain a list of codes. However, they are also displayed on screen along with the corresponding function. ... With Function Keys If you saved a function on a key → page 54, you can access it directly as follows: Press the Mute key to execute the function.

Functions You Can Use

Basic and Enhanced Functions

You can use all basic and enhanced communications platform functions that appear interactively on the screen, in the Program/Service menu, and when you press function keys.

Additional Team and Executive/Secretary Functions

→ page 78f.

To help working and project groups work together more efficiently, the service technician can configure a variety of team functions, depending on your preferences when working in the team. You can use these team functions in addition to the basic and enhanced functions.

In addition to call pickup, hunting groups (group call), and call distribution groups, you can also set up teams with multiple lines per telephone. You can tell if a telephone has trunk keys if your station number and the numbers of your colleagues are programmed on trunk keys. You can access all lines and can also conduct different calls simultaneously on multiple lines.

Another team function category includes the executive/secretary functions, which are configured by the service technician. You can use executive and secretary functions in addition to the basic and enhanced functions as well as other team functions.

An executive/secretary telephone has DSS keys for the executive or secretary, trunk keys for the executive and secretary, as well as ring transfer keys.

Using the Telephone Efficiently

- You probably have certain colleagues or external parties with whom
 you talk on the phone especially frequently. To dial these numbers faster and more conveniently, you can save them on keys
 (Saving station numbers for repertory dialing on keys → page 52).
- All too often you reach a busy line when dialing a number. Amid the
 confusion of your working day, it's easy to forget to try the number
 again later on. To avoid this, make it a habit to use the "Callback"

 → page 45 function.

Quick-Reference Operating Instructions (Appendix)

Making and Answering Calls

Special default ring signaling is set for your telephone:

- When you receive an internal call, your telephone rings once every four seconds (single-tone sequence).
- When you receive an external call, your telephone rings twice in rapid succession every four seconds (dual-tone sequence).
- When you receive a call from the entrance telephone, your telephone rings three times in rapid succession every four seconds (triple-tone sequence).
- If a call is waiting, you hear a short tone (beep) every six seconds.

The number or the name of the caller appears on the display.

Answering a Call With the Handset

Raise or lower the volume. Keep pressing the key until the desired volume is set.

Ending the call:

Replace the handset.

Press the key.

Repla or

+ or -

H

Answering a Call with the Speaker (Speakerphone Mode)

Press the key. The LED lights up.

The telephone rings. The caller appears on the screen.

Speaker

Speakerphone mode.

Raise or lower the volume. Keep pressing the key until the desired volume is set.

+ or -

Ending the call:

Press the key. The LED goes out.

Press the key.

Notes on speakerphone mode:

- Tell the other party that you are using speakerphone mode.
- The speakerphone works bests at a low receiving volume.
- The ideal distance between the user and the telephone set in speakerphone mode is about 50 cm (approx. 20 inches).

Open Listening in the Room During a Call

You can let other people in the room join in on the call. Let the other party know that you have turned on the speaker.

Precondition: You are conducting a call with the handset.

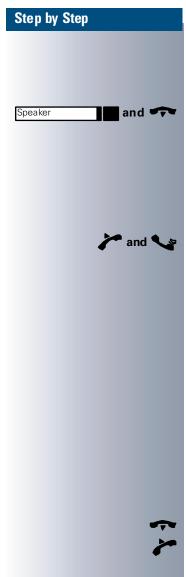

Speaker

Activating ring transfer:

Press the key. The LED lights up.

Deactivating this function:

Press the key. The LED goes out.

Switching to Speakerphone Mode

Precondition: You are conducting a call with the handset.

Hold down the key and replace the handset. (in the U.S.: press the key once and replace the handset). Then release the key and continue the call.

Switching to the Handset

Precondition: You are engaged in a call in speaker-phone mode.

Lift the handset. Continue the call.

Using Call Waiting

Callers can still reach you while you are engaged in another call. A signal alerts you to the waiting call. You can either ignore or accept the waiting call. When you accept the waiting call, you can either end the first call or place it on hold and resume the call later on.

You can also bar call waiting or the call waiting tone → page 15.

Accepting a Waiting Call (Camp-On)

Precondition: You are engaged in a phone call and hear a tone (every six seconds).

Ending the first call and answering the waiting call:

Replace the handset. Your telephone rings.

Answer the second call. Lift the handset.

Placing the first call on hold and answering the second call:

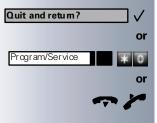

Select and confirm.

Press the key. The LED lights up. Enter the code.

You are connected to the call waiting party immediately. The first party is placed on hold.

Call waiting?

Program/Service

Program/Service

9 0 or 🔢 4

#490=Call wait.trm.off?

* 490=Call wait.term.on?

Ending the second call and resuming the first one:

Confirm.

Press the key. The LED lights up. Enter the code.

Replace the handset. "Recall: ..." appears on the screen. Lift the handset.

Preventing and Allowing Call Waiting (Automatic Camp-On)

If this function has been configured (ask your service technician), you can prevent or allow a second call → page 14 from being signaled by automatic camp-on during an ongoing call.

Press the key. The LED lights up

Select and confirm. or

or

and

Enter the code for "off" or "on".

Turning the Call Waiting Tone On and Off

You can suppress the call waiting tone (every six seconds) for external calls. A one-time special dial tone then alerts you to the waiting call.

Select and confirm.

Waiting tone off? or Waiting tone on? or * 9 7 or # 9

Enter code for "tone off" or "tone on".

Step by Step Accepting a Specific Call for Your Colleague You hear another telephone ring. Program/Service Press the key. The LED lights up Select and confirm. *59=Pickup - directed? Enter the code. 9 A called station appears on the screen. If applicable Next? Select and confirm until you see the station you want. Confirm. Accept call? If you know the number of the telephone that is ringing, enter it directly. or Press the flashing key. Accepting calls in a team \rightarrow page 87. **Rejecting Calls** You can reject calls which you do not wish to take. The call is then signaled at another definable telephone (contact System Support). The telephone rings. The caller is displayed. Release Press the key. If a call cannot be rejected, your telephone will continue to ring. The message "currently not possible" (UK) or "Feature not available" (US) is displayed (e.g in the case of recalls).

US: View messages? UK: Display Messages? US: Message sent? UK: Text? V US: Call voice mail? UK: Call Voice Mail?

Using Mailboxes

If you have programmed the "Mailbox" key → page 54, the associated LED lights up when messages have arrived for you. If your telephone is connected to a voice mail system, the "Mailbox" key will also light up to alert you to any messages that have arrived.

Accessing the Mailbox

Press the illuminated "Mailbox" key.

Confirm.

Select and confirm.

Follow the user prompts.

Using Timed Reminders

Precondition: You must have saved a timed reminder → page 59. The current time is the time stored.

The telephone rings. The timed reminder appears on the screen.

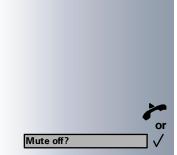

Press the key twice.

Lift the handset and replace it again.

If you fail to answer the timed reminder, it repeats five times and is then erased.

Mute

Using the Speakerphone

A colleague addresses you directly over the speaker with a speaker call. You hear a tone before the announcement. The other party's name or station number appears on the screen.

You can conduct the call with the handset or in speakerphone mode.

Lift the handset and answer the call.

Press the "OK" key to confirm your selection and answer the call

Press the key and answer the call.

If handsfree answerback is enabled (see below), you do not need to switch on the microphone - you can answer directly. You can answer immediately in speakerphone mode.

If handsfree answerback is disabled (default setting), follow the procedure described above.

Placing a speaker call to a colleague → page 26.

En a

Select and confirm.

Enter the code for "on" or "off".

Answering a Call With a Headset

Precondition: Your telephone must be equipped with an optiset E headset or headset plus adapter. The headset is connected to the adapter.

Your telephone rings. Confirm.

Ending the call:

Press the key. The LED goes out.

Step by Step DND on? DND off? 7 or # 9 7

Turning Do Not Disturb On and Off

You can activate the do not disturb function if you do not want the receive any calls. When do not disturb is activated, internal callers hear a busy signal and external callers are rerouted to a telephone assigned for this purpose (System Support).

Select and confirm.

Enter the code for "on" or "off".

or

or

When you lift the handset, a special dial tone (continuous buzzing tone) reminds you that do not disturb is active.

Authorized internal callers can automatically override the do not disturb function after five seconds.

Turning Ringer Cutoff On and Off

You can activate the ringer cutoff function if you do not want the receive any calls. Calls are only identified by **one** ring signal, an indication on the display, and a key which has been programmed to flash (such as a trunk kev).

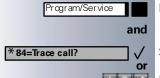

Select and confirm.

Enter the code for "on" or "off".

Trace Call: Identifying Anonymous Callers (Not for U.S.)

You can have the carrier identify malicious external callers. You can save the caller's station number during the call or for 30 seconds after the call ends. However, it is essential that you do not replace your handset during this time

Press the key. The LED lights up.

Select and confirm.

Enter the code.

After you have finished tracing the call, the data is stored on the carrier's system. Now contact System Support.

Turning the Microphone On and Off

To prevent the other party from listening in while you consult with someone in your office, you can temporarily switch off the handset microphone or the handsfree microphone. You can also switch on the handsfree microphone to answer an announcement via the telephone speaker (speaker call, → page 18).

Precondition: You are conducting a call. The microphone is switched on.

Press the key. The LED lights up.

Press the illuminated key. The LED goes out.

Mute on?

Mute off?

Program/Service

Mute

Select and confirm.

Press the key. The LED lights up

Enter the code for "on or "off".

Answering Calls from the Entrance Telephone and Opening the Door

If an entrance telephone has been programmed, you can use your telephone to speak to someone at the entrance telephone and to activate a door opener. If you have the proper authorization (contact System Support), you can activate the **door opener**, enabling visitors to open the door themselves by entering a 5-digit code (using a DTMF transmitter or installed keypad).

Speaking to visitors via the entrance telephone:

Precondition: Your telephone rings.

Lift the handset within thirty seconds. You are connected to the entrance telephone immediately.

Lift the handset after more than thirty seconds.

Dial the entrance telephone number.

On an in with a day of five many constant and a surface of surface of the surface

Opening the door from your telephone during a call from the entrance telephone:

Confirm.

Opening the door from your telephone without calling the entrance telephone:

Press the key. The LED lights up.

Select and confirm.

Enter the code.

Dial the entrance telephone number.

Special features must be taken into consideration if your telephone operates with HiPath AllServe (system networking via PC network)

→ page 95!

Opening the door with a code (at the door):

After ringing the bell, enter the five-digit code (using the keypad or a DTMF transmitter). Depending on how the door opener has been programmed, a doorbell call signal may or may not be forwarded.

Activating the door opener:

Press the key. The LED lights up

Select and confirm.

Enter the code.

Dial the entrance telephone number.

Enter the five-digit code. Default code = "00000".

Select the displayed function and press the "OK" dialog key to change the code.

Select and confirm.

You can also open the door without a doorbell ring.

Deactivating the door opener:

Press the key. The LED lights up.

Select and confirm.

Enter the code.

Accepting a Call From an Answering Machine

You can accept a call from any answering machine if the machine is connected to your system (contact System Support) and you have programmed the answering machine number on a key → page 54.

The LED lights up. Press the key.

Display Number of Waiting Calls and Overload Indication

You can show the number of external waiting calls on the display by pressing the "View number of calls" key → page 54.

Press the "Waiting calls" key.

If the number of waiting calls exceeds a preset limit while you are engaged in another call (overload), the LED on the key lights up. Contact System Support to find out the waiting call limit.

- LED off:
 - No callers waiting.
- LED flashes slowly: You have reached the programmed threshold.
- LED flashes rapidly: You have exceeded the threshold value (overload).

Making Calls

Off-Hook Dialing

Lift the handset.

Internal calls: Enter the station number.

External calls: Enter the external code and t

External calls: Enter the external code and the station number.

Replace the handset.

On-Hook Dialing

Internal calls: Enter the station number. External calls: Enter the external code and the station number.

The other party answers with speaker:

Lift the handset.

On-hook: Use speakerphone mode.

The called party does not answer or is busy:

Press the key. The LED goes out.

Your system may also be programmed so that you have to press the Internal key before you dial an internal number.

To call an external party, you have to enter an external code before dialing the party's telephone number (Prime Line is not active; contact System Support).

Step by Step or Dial? Delete number? End? or Loudspeaker or Release

En-Bloc Sending / Correcting Numbers

If this feature is configured (contact System Support), a connection is not attempted immediately when a station number is entered. This means that you can correct the number if necessary.

The station number is only dialed at your specific request.

Internal: enter station number.

External: enter external code and station number.

Dialing entered/displayed numbers:

Lift the handset.

Confirm.

Correcting numbers entered:

Select and confirm.

The last digit entered in each case is deleted.

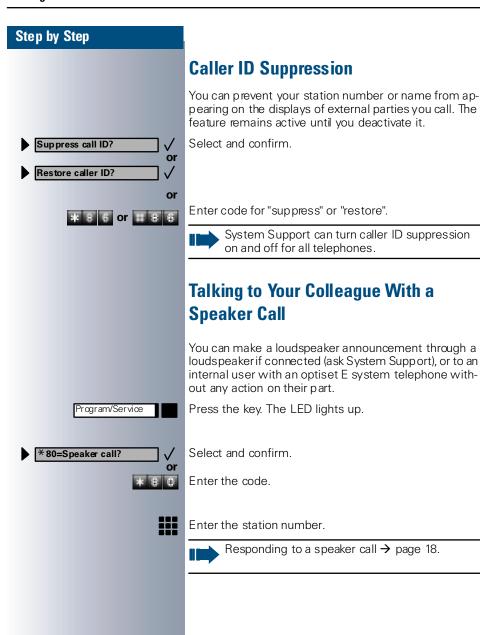

Enter the required digit(s).

Canceling en-bloc sending:

Select and confirm.

Press the key. The LED goes out.

Press the key.

Activating Tone Dialing (DTMF Suffix Dialing)

You can transmit dual-tone multifrequency (**DTMF**) signals to control devices such as an answering machine or automatic information system.

Press the key. The LED lights up.

Select and confirm.

Enter the code.

You can use the keys "0" through "9", "*", and "#" to transmit DTMF signals.

Ending the call also deactivates DTMF suffix dialing.

Your system may be configured so that you can start DTMF suffix-dialing immediately after setting up a connection.

Automatic Connection Setup (Hotline)

If this function is configured (contact System Support), the system automatically sets up a connection to a preset internal or external destination.

Lift the handset.

Depending on the setting, the connection is either set up immediately or only after a preset period of time (hotline after a timeout).

Step by Step **Reserve Trunk** If this feature is configured (contact System Support), you can reserve a busy trunk for your own use. When the trunk is free, you receive a call and a message appears on the display. **Precondition:** The message "US:Currently busy UK:busy at the moment" appears on your screen. Confirm. Reserve trunk? When the reserved trunk becomes free: Your telephone rings. The display shows "Trunk is free". Lift the handset. You hear the CO dial tone. Enter the number of the external station. Assigning a Station Number (Not for U.S.) If this function has been configured (contact System) Support), you can selectively assign a specific number (DID number) to your telephone before making an external call. The assigned number then appears on the called party's display. Press the key. The LED lights up. Program/Service Select and confirm. *41=Temporary MSN? or

Dial the external number.

Enter the DID number you wish to use.

Enter the code.

Trunk Flash

To activate ISDN-type services and features through the network carrier's analog trunks or those of other communications platforms (such as "consultation hold"), you must send a signal to the trunks before dialing the service code or telephone number.

Precondition: You have set up an external connection.

Press the key. The LED lights up.

Select and confirm.

Enter the code.

Enter the service code and/or telephone number.

Associated Dialing/Dialing Aid

If this function has been configured (contact System Support), you can use a dialing aid to dial numbers and set up calls for your telephone.

The operating procedure depends on whether the dialing aid is connected to the S_0 bus or the a/b (T/R) port.

You can also use your system telephone as a dialing aid for other telephones.

Dialing aid on the S₀ bus:

On the PC, select a destination and start dialing.

The speaker on your telephone is switched on. Lift the handset when the other party answers.

Dialing aid at the a/b (T/R) port:

On the PC select a destination and start dialing.

"Lift the handset" appears on the PC screen.

Lift the handset.

Dialing aid from your telephone for another telephone:

Press the key. The LED lights up.

Select and confirm.

Enter the code.

Enter the internal station number ("Dial for:").

Enter the number you wish to dial.

US: Consult?
UK: Enquiry?

Return to held call?

Quit and retum?

Program/Service

Calling Multiple Parties Simultaneously

Calling a Second Party (Consultation Hold)

You can call a second party while engaged in a call. The first party is placed on hold.

or

or

Confirm.

Call the second party.

Return to the first party:

Confirm.

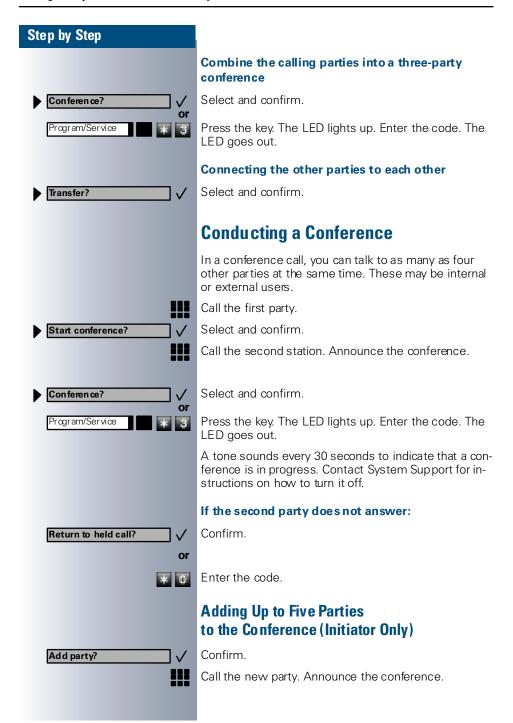

Press the key. The LED lights up. Enter the code. The LED goes out.

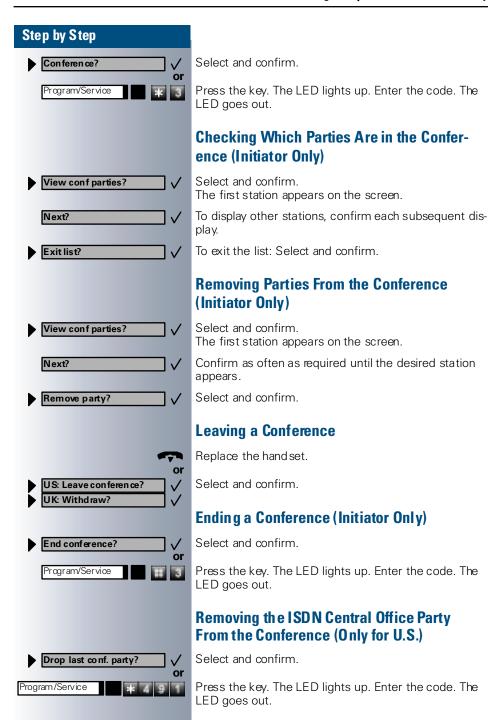

Switching to the Party on Hold (Toggle)

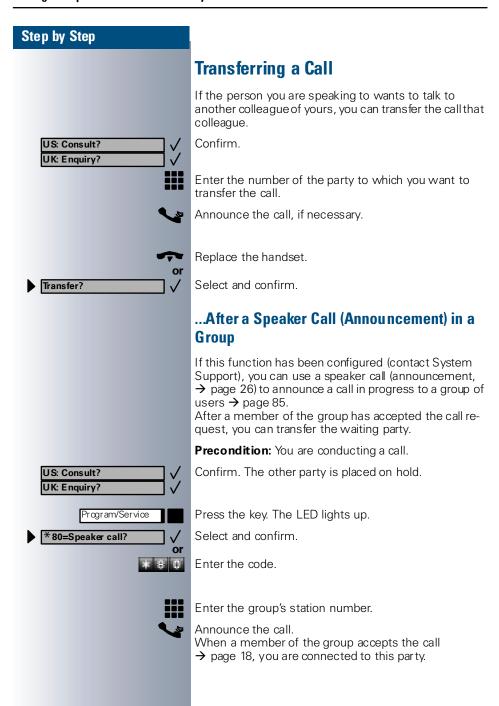

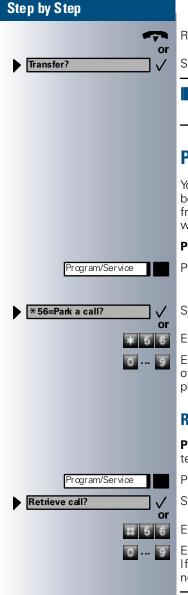

Select and confirm.

Press the key. The LED lights up. Enter the code. The LED goes out.

Replace the hand set.

Select and confirm.

If the connection between the two other parties is not established within 45 seconds, the call from the first part returns to you (recall).

Parking a Call

You can park up to ten calls, either internal, external, or both. Parked calls can be displayed on and picked up from another telephone. This feature is useful if you want to continue a call at another phone.

Precondition: You are conducting a call.

Press the key. The LED lights up.

Select and confirm.

Enter the code.

Enter the number of the park slot (0 - 9) and make a note of it. If the park slot number you entered is not displayed, it is already in use; enter another one.

Retrieving a Parked Call

Precondition: One or more calls have been parked. The telephone is idle.

Press the key. The LED lights up.

Select and confirm.

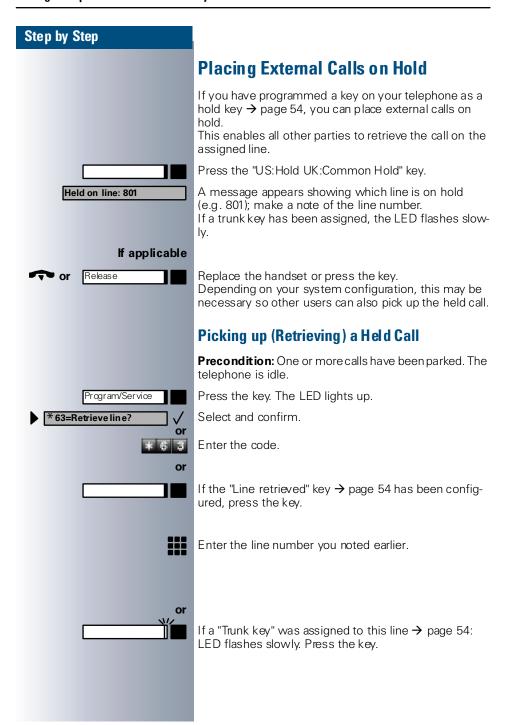

Enter the code.

Enter the park slot number you noted earlier.

If the park slot number you enter is not in use, you cannot retrieve the call.

If a parked call is not picked up, after a specific period of time the call is returned to the telephone from where it was parked (recall).

Making Calls to Stored Destinations

Using a Caller List

If you are unable to accept an external or internal call, the call attempt is stored in the caller list.

You can store answered calls either manually (both internal and external calls) or automatically (external calls only; contact System Support for details).

Your telephone stores up to ten calls in chronological order. Each call is assigned a time stamp. The most recent entry not yet answered in the list is displayed first. Multiple calls from the same caller do not automatically generate new entries in the caller list. Instead, only the most recent time stamp for this caller is updated and its number incremented

Retrieving the Caller List

Precondition: System Support has set up a caller list for your telephone.

Enter the code.

The last call is displayed on the screen.

To view other calls, confirm each subsequent display.

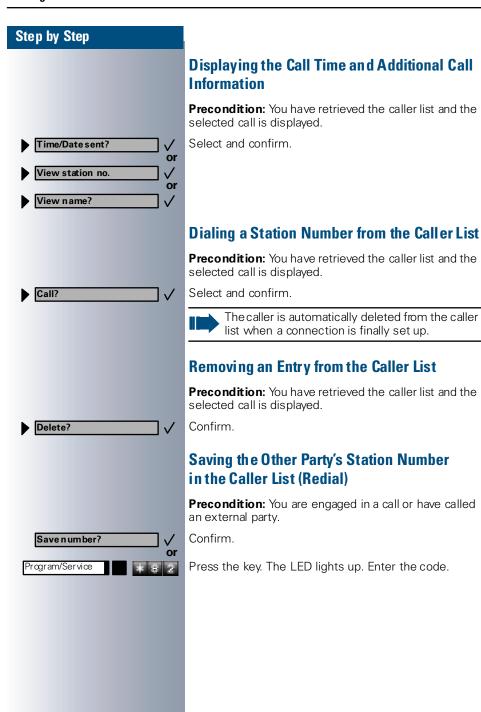

Ending Retrieval

Select and confirm.

Press the key. The LED goes out.

Press the key. The LED goes out.

Redialing a Number

The last three external telephone numbers dialed are stored automatically.

You can redial them simply by pressing a key.

The station number appears on your screen for two seconds and is then dialed.

Press the key once to dial the number last dialed.

Press the key twice to dial the next to the last number dialed.

Press the key three times to dial the third-to-the-last number dialed.

Displaying and dialing saved station numbers

Press the key.

Press the "OK" dialog key within two seconds to confirm your choice.

The next stored number is displayed. Press the "OK" dialog key to confirm four selection.

Select and confirm.

If this feature is configured (contact System Support), account codes entered are also saved page 44.

Redial

Next? \rightarrow Call?

Dialing a Number From the Internal Directory

The internal directory contains all station numbers and system speed-dial numbers assigned to a name. Contact System Support to find out if one was configured for your system.

Precondition: Names have been assigned to the station numbers stored in the system.

Lift the handset.

Press the key. The LED lights up.

Confirm.

The first entry is displayed on the screen.

To view further entries, confirm each subsequent display.

Select and confirm.

Enter the name you want to find, or just the first few letters, using the alphanumeric keypad.

You can use the keypad with the digits as an alphanumeric keypad in this case and enter the names by pressing the appropriate keys one or more times as needed.

For example, you can enter the letter "R" by pressing the "7" three times or the letter "E" by pressing the "3" twice. The first name with the entered letters is displayed. Enter the following letters by using the same method.

If no entry exists for the entered letters, you will hear a short beep.

To enter a space, press the "0".

Pressing "1" automatically displays the first entry in the internal directory.

The "*"and "#" keys have no function here.

Select and confirm each letter to be deleted. The last letter entered is deleted.

Select and confirm. All entered letters are deleted, and the first entry in the internal directory is displayed again.

Step by Step The entry you wish to dial appears on the screen. Select and confirm. Call? **Using Repertory Dialing Keys** Precondition: You have saved a station number on a repertory dialing key → page 52. Press the key on which the number is saved. If the station number is located on the second level, first press "Shift". You can also press the repertory dial key during a call. This automatically sets up a consultation → page 31. **Using Station and System Speed-Dial** Numbers **Precondition:** You have stored station speed-dial numbers → page 53 or System Support has stored system speed-dial numbers. Program/Service Press the key. The LED lights up *7=Use speed-dialing? Confirm. Enter the code. Enter a speed-dial number. "*0" to *9" = station speed-dialing. "000" to "999" = system speed-dialing (contact System Support).

Displaying and Assigning Call Charges

Displaying Call Charges (Not for U.S.)

For the current call:

The display usually shows call charges at the end of a call (default setting).

If you wish to display charges continuously during a call in progress, System Support must request this feature from your carrier.

Some carriers also let you display toll-free external calls. The message "Free of Charge" appears on the screen either before or during the call.

If a call is transferred, the charges are assigned to the telephone to which the call was transferred.

For all calls and the last one conducted:

The connection charges for the last chargeable call conducted are displayed first. Five seconds later, the total accumulated connection charges appear.

Press the key. The LED lights up.

Select and confirm.

Program/Service

* 65=Show call charges?

Or

Enter the code.

Next?

If this function is configured (contact System Support), you can display and print the chargeable calls for other telephones (such as a pay phone)

Precondition: You have programmed the function "View call charges" on a key → page 54.

The LED lights up to indicate that a you have conducted chargeable call since the last time you viewed the charges.

Press the "View call charges" key. The chargeable call appear on the screen.

To display further chargeable calls, confirm each subsequent display.

Print?

Or

Delete?

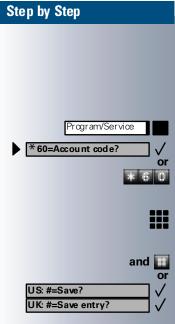

Ad d'1 information?

Or

US: Exit?

UK: End?

Select and confirm.

Dialing with Call Charge Assignment

You can assign external calls to certain projects.

Precondition: System Support has set up account codes for you.

Press the key. The LED lights up.

Select and confirm.

Enter the code.

Enter the account code.

Press this key.

Confirm.

May be necessary, depending on how your system is configured; contact System Support for details.

Enter the number of the external station.

You can also enter the account code during an external call.

If You Cannot Reach a Destination ...

Using Callback

If a user is busy or is not answering, you can store an automatic callback. This feature saves you from having to make repeated attempts to reach the user.

You receive a callback,

- When the other party is no longer busy
- When the user who did not answer has conducted another call

Storing a Callback

Precondition: You have reached a busy line or no one answers.

Confirm.

Enter the code

Answering a Callback

Precondition: A callback was saved. Your telephone rings. "Callback: ..." appears on the display.

Lift the handset.

You hear a ring tone.

Checking and Canceling a Saved Callback

Select and confirm.

Enter the code.

Speaker

Select the displayed function and press the "OK" dialog key to display additional entries.

Camp-on

Deleting a displayed entry:

Press the "OK" dialog key to confirm your selection

Ending callback display:

Select and confirm.

Press the key. The LED goes out.

Press the key. The LED goes out.

Call Waiting (Camp-On)

Precondition: You have dialed an internal number and hear a busy signal. It is important that you reach the called party.

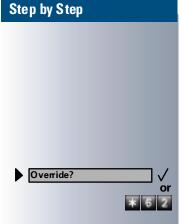

Wait (approx. 5 seconds) until "Camp-on" appears on the display and the busy tone is followed by the ring tone.

The called party can then respond → page 14

The called party can prevent automatic call waiting → page 15.

If this feature is configured (contact System Support), you will hear the ring tone and the message "Camp-on" is immediately displayed.

Busy Override - Joining a Call in Progress

This function is only available if it has been configured by the service technician (contact System Support).

Precondition: You have dialed an internal number and hear a busy signal. It is important that you reach the called party.

Select and confirm

Enter the code.

The called party and person to whom this party is talking hear an alerting tone every two seconds. If the called party has a system telephone with display, the following appears on the screen: "Override: (station no. or name)".

You can now start talking.

Telephone Settings

Adjusting the Ring Volume

+ or − Press these keys while the phone is idle.

Confirm.

To raise or lower the volume: Keep pressing the keys until the desired volume is set.

Save.

+ or - Press these keys while the phone is idle.

Select and confirm.

To adjust the ring tone: Keep pressing the keys until the desired tone is set.

Save.

Adjusting the Attention Ring Volume

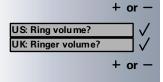

If you belong to a team that uses trunk keys, the telephone can alert you to other calls in the team even when you are engaged in another call \rightarrow page 83. You hear the attention ring.

Press one of these keys while the phone is idle.

Select and confirm.

To raise or lower the volume: Keep pressing the keys until the desired volume is set.

Save.

Speakerphone mode?

Adjusting the Speakerphone to the Room Acoustics

To help the other party understand you clearly while you are talking into the microphone, you can adjust the telephone to the acoustics in your environment: "Quiet room", "Normal room" and "Noisy room".

+ or -

+ or -

Press one of these keys while the phone is idle.

Select and confirm.

To set the room type: Keep pressing these keys until the setting you want appears on the screen.

Save.

Adjusting the Display to a Comfortable Reading Angle

You can swivel the display unit. Adjust the display unit so that you can clearly read the screen.

Selecting the Language of Screen Prompts

Press the key. The LED lights up.

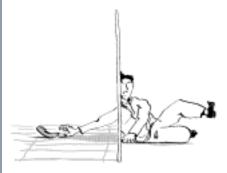

Confirm.

Confirm.

Enter the code.

Select the language you wish to use (such as "Spanish") and press the "OK" dialog key to confirm.

Locking the Telephone to Prevent Unauthorized Use

You can prevent unauthorized persons from using your telephone and its electronic notebook during your absence.

Precondition: You must have configured a personal identification number (PIN) for your telephone → page 51.

To lock and unlock the telephone:

Select and confirm.

Enter the code for "on" or "off".

Enter the telephone lock PIN \rightarrow page 51.

While the telephone is locked, a special dial tone sounds when you lift the handset. You can continue to dial internal numbers as usual.

Your telephone can also be locked or unlocked again by an authorized party \rightarrow page 71.

Saving Your PIN

To use the functions

- to prevent unauthorized persons from using your telephone → page 50
- to use another telephone like your own → page 66
- to change your call number → page 67

you need to enter a personal identification number, which you can save yourself.

Press the key. The LED lights up.

Confirm.

Enter the PIN.

Enter the current five-digit PIN.

If you have not yet assigned a PIN, use the PIN "00 000" the first time you enter it.

Enter the new PIN.

Repeat the new PIN.

If you forget your PIN, contact System Support, who can reset your PIN to "00000".

An authorized party → page 71 can also lock and unlock your telephone.

Saving Station Numbers, Functions, Procedures and Appointments

You can save a frequently-dialed number, or frequentlyused functions/procedures (comprising several operating steps) to any free key on your telephone or add-on device.

If you have programmed a Shift key, you can assign numbers and functions on two levels of the programmable keys. The second (Shift level) can accept only an external station number.

Enter the procedure, e.g. "*67 231 089123456". *67= code for associated dial 231= station number of the calling party 089123456 = number to be dialed.If necessary To insert pauses, press this key (a "P" is displayed). Redial Confirm. US: Save entry? UK: Save? If you make a mistake: Select and confirm. This deletes all digits entered. Previous?

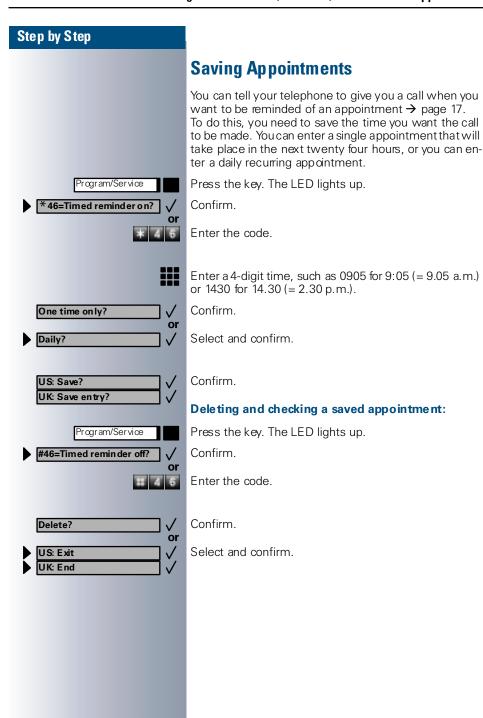

Confirm.

Select and confirm.

Select the stored procedure by pressing a key. Procedures containing functions which can be switched on/off can be activated by pressing the key, and deactivated by pressing the same key again.

You can also press a procedure key during a call. The stored digits are automatically sent as DTMF signals → page 27.

Testing the Telephone

Testing the Telephone Functions

You can test your telephone functions.

Precondition: Your telephone is idle.

Press the key. The LED lights up.

Select and confirm.

Enter the code.

If everything is OK,

- all LEDs on the telephone start flashing, including the ones on the key module (only the Program/Service menu LED lights up);
- your station number appears on the screen;
- all pixels in the display are activated;
- the ringer signal sounds.

Checking the Key Assignment

You can check the assignment of keys on your telephone to see which functions are programmed on which keys.

Press the key. The LED lights up.

Select and confirm.

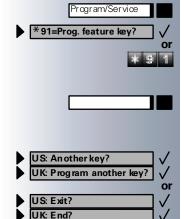

Enter the code.

Press the key. The key assignment appears on the screen.

Select and confirm.

Select and confirm.

Call Forwarding

Using Variable Call Forwarding

You can immediately forward internal or external calls to different internal or external telephones (destinations). (External destinations require special configuration in the system.)

Special features must be taken into consideration if your telephone operates with HiPath AllServe (system networking via PC network)

page 91!

Forwarding on?

or

Select and confirm.

Enter the code.

1=all calls?

Or

2=external calls only?

Or

3=in ternal calls on ly?

Or

Or

Or

Select and confirm.

Enter the code.

Enter the number of the telephone that is ringing.

Confirm.

Deactivating call forwarding:

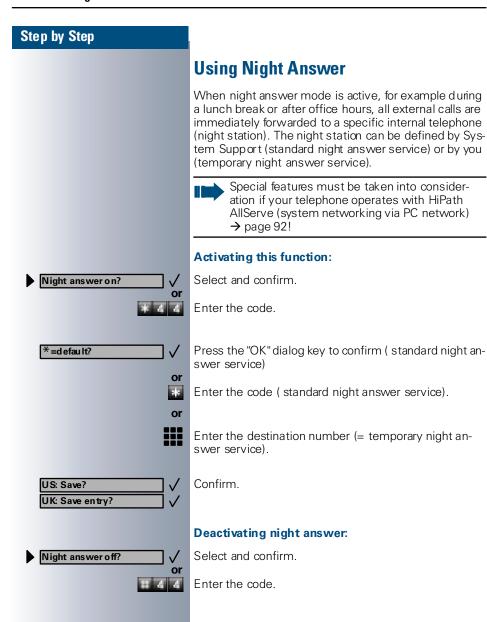

Select and confirm.

Enter the code.

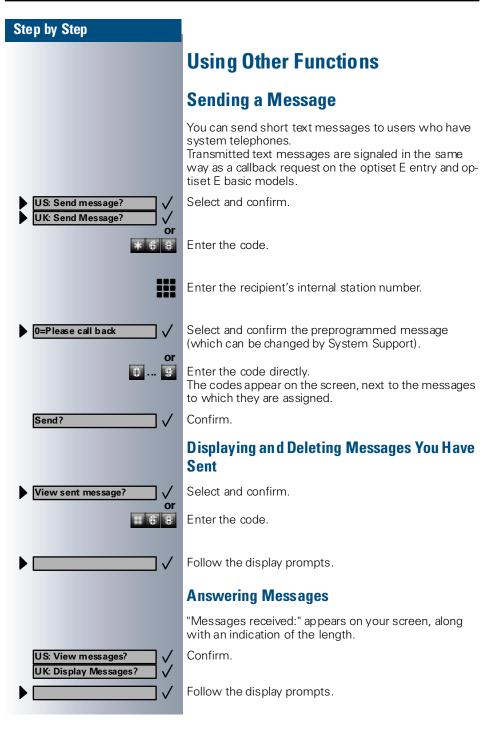

When call forwarding is active, a special dial tone sounds when you lift the handset.

If DID DTMF is active (contact System Support), you can also forward calls to this destination. Destinations: fax = 870, DID = 871, fax DID = 872.

Step by Step **Call Forwarding in the Carrier Network** and Forwarding Multiple Subscriber Numbers (MSN) (Not for U.S.) If this function has been configured (contact System Support), you can forward calls to your assigned multiple subscriber number (MSN) (DID number) directly within the carrier network. For example, you can forward your phone line to your home phone after business hours. Trunk FWD on? Select and confirm. or Enter the code. Select and confirm the line type you wish to use. 1=im med iate? or 2=on no answer? or 3= on busy? or 🔃 or 🛐 Enter the code. Enter your DID number. Enter the destination number (without the external code). Confirm. Save? Deactivating call forwarding: Select and confirm. Forwarding - trunk off Enter the code. Confirm the displayed call forwarding type. or 🛂 or 🛐 Enter the activated call forwarding type. Enter your DID number.

Leaving an Advisory Message

You can leave an advisory message on your telephone screen for internal callers who want to reach you while you are away from your desk.

When another party calls you, the message appears on the caller's screen.

Select and confirm.

Enter the code.

Select and confirm the preprogrammed message (which can be changed by System Support).

Enter the code directly.

The codes appear on the screen, next to the messages to which they are assigned.

You can add numeric input to preprogrammed messages that end in a colon.

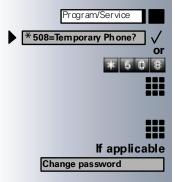

Deleting Advisory Messages

Select and confirm.

Enter the code.

If you have programmed an "Advisory message" key
→ page 54: The LED lights up. Press the key.

Using Another Telephone Like Your Own

Other people can temporarily use your telephone for outgoing calls as though it were their own.

Press the key. The LED lights up.

Select and confirm.

Enter the code.

Enter the other user's station number.

Enter the other user's telephone lock PIN. → page 51.

Users who have not yet selected a personal identification number are prompted to do so on their own telephones.

Dial the external number.

This state is canceled at the end of the call.

Change call number (relocate)

You can put your call number on every other available telephone when it is set up (ask System Support). Your previous telephone then receives the old call number of your new telephone. The call number together with the settings (e.g. programmed keys) of the telephone are changed.

Precondition: Your old and new telephone are the first telephones at each connection. The telephone are in idle state.

The following procedure is carried out on the new telephone.

Press the key. The LED lights up.

Select and confirm.

Enter the code.

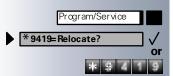

Enter your own call number.

Enter code (telephone lock) → page 51. (This is not necessary if you have not determined a code yet).

Confirm.

Enter the code.

If you exchange call numbers from different system telephones, all programmed keys are replaced with the default assignment.
You can, however, connect your telephone to another connection and carry out the procedure.

Fax Details and Message on Answering Machine

If a fax or answering machine is connected to your system and you have assigned the "Fax details" function to a programmable key \rightarrow page 54, the key lights up when a fax or a message has been received.

Deactivating indication:

Press the illuminated "Fax details" key. The LED goes out.

Resetting Services and Functions (System-Wide Cancellation for a Telephone)

There is a general reset procedure for activated functions. The following functions are canceled, if they were activated:

- Forwarding on
- Advisory msg. on
- Ringing group on
- Hunting group off
- Suppress call ID
- Waiting tone off
- DND on
- Ringer cutoff on
- Messages received:
- View callbacks

Press the key. The LED lights up.

Select and confirm.

Enter the code.

Silent Monitor

If this function has been configured (contact System Support), you can join a call already in progress at an internal station and listen in unnoticed.

Enter the code.

Enter the internal station number.

Monitoring a Room

A telephone can be used to monitor a room. The function must be activated on the telephone that you want to monitor.

Calling this telephone lets you hear what is going on in the room.

Activating the telephone to be monitored:

Press the key. The LED lights up.

Select and confirm.

or

Enter the code.

You can either leave the telephone in speakerphone mode or lift the handset and leave it directed towards the noise source.

Deactivating the telephone to be monitored:

Press the illuminated key. The LED goes out.

Replace the hand set.

Monitoring the room:

Enter the internal number if the telephone in the room you wish to monitor.

Activating Functions for Another Telephone

If this function has been configured (contact System Support), you can turn the following functions on and off for other telephones. This feature is also known as associated service.

- Do not disturb, code: *97/#97 → page 19
- Call forwarding, code: *11, *12, *13/#1 → page 61
- Locking and unlocking telephone, code: *66/#66 → page 50
- Group ringing, code: *81/#81 → page 85
- Leaving an advisory message, code: *69/#69 → page 65
- Group call,
 - code: *85/#85 → page 85
- Reset services and functions, code: #0 → page 68
- Control relay,
 - code: *90/#90 → page 75
- Night service, code: *44/#44 → page 62
- Timed reminders, code *65 → page 59

Press the key. The LED lights up.

Confirm

Enter the code.

Enter the internal number of the telephone for which you want to activate the function.

Enter the code, such as *97 for do not disturb.

Follow the prompts on the screen for any further input.

Locking Another Telephone to Prevent Unauthorized Use

If this function has been configured (contact System Support), you can lock other telephones to prevent unauthorized use and then unlock them again later.

You can use this function to unlock the telephone for users who have locked their telephones and then forgotten their PINs.

Press the key. The LED lights up.

Confirm.

Enter the code.

Enter the internal number of the telephones that you want to lock or unlock.

*=Lock phone? or #=Unlock phone? or e or

Program/Service

*943=Lock all phones?

Confirm.

Enter the code.

Using System Functions from the Outside (DISA: Direct Inward System Access)

If this function has been configured (contact System Support), you can set up external outgoing calls from outside the system, just like an internal user. You can also activate and deactivate the following functions in your system:

- Reset services and functions,
- Call forwarding, code: *1/#1 → page 61
- Lock and unlock all phones, code: *66/#66 → page 50
- Save PIN. code: *93 → page 51 Send a message,
 - code: *68/#68 → page 64

- Leave an advisory message, code: *69/#69 → page 65
- Group ringing, code: ★81/#81 → page 85
- Group call, code: *85/#85 → page 85
- Suppress caller ID, code: *86/#86 → page 26
- Waiting tone, code: *87/#87 → page 15
- Open door, code: *61 → page 21
- Door opener on/off, code: *89/#89 → page 22
- Control relay, code: *90/#90 → page 75
- Do not disturb, code: *97/#97 → page 19
- Ringer cutoff function, code: *98/#98 → page 19
- Speed-dialing, code: *7 → page 41
- Associated service, code: *83 → page 70

Precondition: You have a telephone that uses tone dialing (DTMF dialing) or you can switch your telephone to tone dialing. The telephone is not connected to the system.

Wait for a continuous tone (if necessary switch the telephone to tone dialing), then enter the internal number that has been assigned to you and the associated PIN.

Enter the code (necessary only if programmed in the system).

Wait for a dial tone and then enter the code, such as *97 for Do not disturb on. Make other inputs as necessary; (refer to the operating instructions for pulse and DTMF telephones).

or

Dial the external number.

You can only execute one function at a time, or set up only one outgoing connection.

The connection is immediately released after successful activation of a function.

In the case of an external-external call, the connection is released as soon as either of the parties ends the call.

Using functions in ISDN via code dialing (keypad dialing)

If authorized (contact System Support), you can set ISDN functions via code dialing in some countries.

Press the key. The LED lights up.

Confirm.

Enter the code.

Enter the number of the trunk you wish to use (contact System Support).

Contact your network provider to find out which ISDN functions can be code-controlled in your country.

Siemens AG shall not be liable for damages/ costs which may be incurred by fraudulent activities or remote operation (e.g. toll fraud).

Step by Step Program/Service *42=Tel. data service? 0 ... 9 or Entry complete? or

Controlling Connected Computers or Other Programs and Telephone Data Service (Hi Path 3500/3550/3700/3750 Only)

If this function has been configured (contact System Support), you can control connected computers or programs running on them, such as hotel services or information systems, from your telephone.

Precondition: You have set up a connection.

Press the key. The LED lights up.

Confirm.

Enter the code.

The connected computer now prompts you to enter the data, which you can do in one of two ways. Contact System Support to find out which option is programmed in your system:

Input in en-bloc mode.

Enter data.

Press this key at the end of the entry.

Confirm.

Input in online mode:

The connected computer processes your entries directly.

Enter the code.

Enter data.

Controlling Relays

If this function has been configured (contact System Support), you can turn up to four relays on and off to control different facilities (such as a door opener). Depending on how they are programmed, you can switch the relays on and off or switch them on and have them switched off automatically after a timeout.

Special features must be taken into consideration if your telephone operates with HiPath AllServe (system networking via PC network)

page 94!

Select and confirm.

Enter the code for "on" or "off".

Enter the relay.

Sensors (HiPath 3300/3350/3500/3550 Only)

If this function has been configured (contact System Support), sensors detect signals, causing your phone to ring and a message to appear on your screen.

Radio Paging (Not for U.S.)

If paging equipment is connected to your system (contact System Support), you can contact people via their pocket receivers.

The pocket receiver indicates to the person you are looking for that someone is trying to get in touch. The person you page can then go to the nearest telephone and call you.

The operating procedures differ according to the type of radio paging equipment connected (simple or enhanced paging equipment).

Simple Paging Equipment

Paging:

To be paged, you must have activated a call ringing group → page 87, call forwarding → page 61, or call redirection (service technician) to the internal station number of your paging equipment.

A call request is then signaled automatically.

Answering the page from the nearest telephone:

Lift the handset.

Enter the code.

Enter your own station number.

Enhanced Paging Equipment (Hipath 3700/ 3750 Only)

Paging:

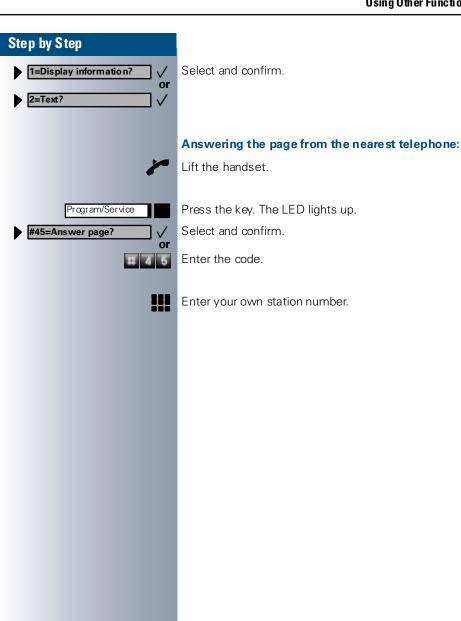

Press the key. The LED lights up.

Select and confirm.

Enter the code.

Enter the number of the party you want to page.

Team and Executive/Secretary Functions With Trunk Keys

If this function has been configured (contact System Support), you belong to a team of users for whom special keys were programmed:

- Trunk keys (MULAP keys)
- Direct station selection kevs
- Group call key (not on the executive telephone in an executive/secretary team)
- Ring transfer keys (only in an executive/secretary team)

As a team member, you can also program these keys yourself ("MULAP key", "Direct station select", "Hunt group join/leave", "Ring transfer: on/off") → page 54. You can also program a call forwarding key ("Forward Line") for each line.

Using Trunk Keys

A separate trunk is assigned to each team member. All other team members have the same trunk keys for these trunks on their telephones. This means that every team member can use all programmed trunk keys. Each team member can also be reached under a separate station number, if one was assigned.

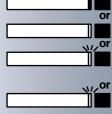

Meaning of LED Indications on Trunk Keys:

Trunk key LED is lit - Trunk is in use.

Trunk key LED is flashing **rapidly** - A call on the trunk needs to be answered.

Trunk key LED is flashing **slowly** - A call on hold is waiting.

Step by Step or Release

Answering Calls With Trunk Keys

Precondition: Your telephone is ringing and/or the trunk key is flashing rapidly.

Press the rapidly flashing trunk key.

This is not necessary if the trunk is automatically assigned to you when you lift the handset or press the "Speaker" key, in this case the assigned trunk key lights up.

Lift the handset.

With on-hook dialing: Use speakerphone mode.

Making Calls with Trunk Keys

Press the free trunk key that you want to use to set up your call.

This is not necessary if the trunk is automatically assigned to you when you lift the handset or press the "Speaker" key; in this case the assigned trunk key lights up.

Dial the station number.

When the other party answers: Lift the handset.

With on-hook dialing: Use speakerphone mode.

Using a Trunk Key to Place a Call on Hold and Retrieve It Again

Precondition: You are conducting a call over a trunk in your group. The "US:Hold UK:Common Hold" key has been programmed on your telephone → page 54.

Placing a call on hold:

Press the "US:Hold UK:Common Hold" key.

Replace the hand set or press the key.

Depending on the configuration (contact System Support), this may be necessary so other team members can also pick up the call on hold.

Retrieving the call:

Press the slowly flashing trunk key.

Step by Step Program/Service *501=Forward Line: On? or

Switching Between Phone Calls on Multiple Trunks

Precondition: You are conducting a call over a trunk in your group. Another trunk key starts flashing.

Press the flashing trunk key. The first party is placed on hold on the other trunk.

Press the slowly flashing trunk key. The second party is placed on hold.

You can switch between the two call as many times as you wish. Always press the slowly flashing trunk key.

Forwarding Calls on Lines

You can immediately forward internal or external calls on your lines to different internal or external telephones (destinations); even external destinations are possible in certain system configurations.

Activating call forwarding for one trunk activates the function for all trunk keys assigned to this trunk in your group.

Press the key. The LED lights up.

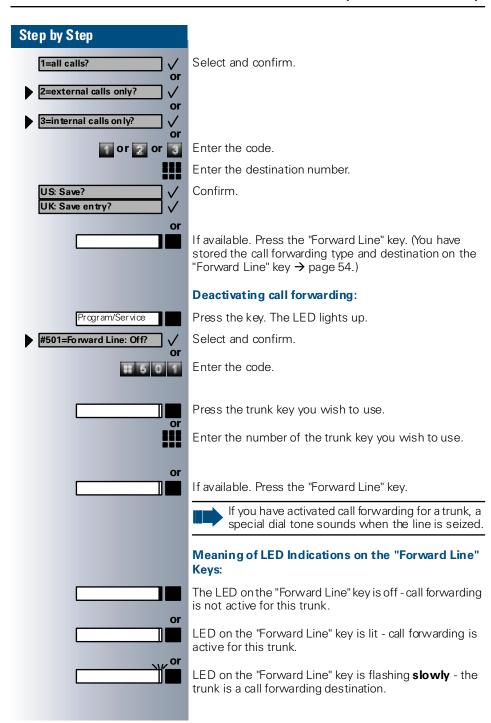

Select and confirm.

Enter the code.

Press the trunk key you wish to use.

Enter the number of the trunk you wish to use.

If available. Press the "Forward Line" key. (You have stored the incomplete "Forward Line" function on the key, excluding the call forwarding type and destination → page 54.)

Step by Step **Using DSS Keys** Each team member has a DSS key for every other member in the team. This enables every team member to reach all other members of the team directly, simply by pressing a key. Meaning of LED Indications on DSS Keys LED on the DSS kev is off - the team member is not engaged in a phone call. or LED on the DSS key is lit-the team member is engaged in a phone call or has activated do not disturb. LED on the DSS key is flashing rapidly - a call has arrived for you and needs to be answered. LED on the DSS keys is flashing slowly - a caller is trying to reach another member of your team, who has not vet answered. Using DSS Keys to Answer Calls **Precondition:** Your telephone is ringing and/or a DSS key is flashing. Press the flashing DSS key. If appl. This is not necessary if you are receiving a DSS call and the DSS key is flashing rapidly. Lift the handset. With on-hook dialing: Use speakerphone mode. **Calling a Team Member Directly** Press the direct station selection kev. or If the team member you wish to reach is engaged in another call, the DSS key on your telephone is illuminated. You can make the call even in this case. When the other party answers: Lift the handset. With on-hook dialing: Use speakerphone mode.

or Release

Step by Step

Transferring a Call in Progress

Press the DSS key and announce the call, if desired.

Replace the hand set or press the key.

Accepting a Call for Another Team Member

Press the flashing DSS key or trunk key. Lift the handset.

With on-hook dialing: Use speakerphone mode.

Joining or Leaving a Group Call (Not for the Executive Telephone in an Executive/Secretary Team)

By default, your telephone rings when a call arrives on your line.

If you wantyour phone to ring even when calls arrive on other lines, you can turn your ringer on and off for each line in your group → page 85.

Your telephone rings (one time only or every four seconds) even when you are engaged in another call (attention ring volume → page 48).

Step by Step Transferring Calls Directly to the Executive (Only in an Executive/Secretary Group) Normally, audible signaling of all calls for the executive is heard only in the secretary's office. You can activate audible signaling so that calls are only signaled on the executive telephone and on a second telephone assigned to it. Activating ring transfer: Press the Ring Transfer" key. The LED lights up. Press the key. The LED lights up. Program/Service Select and confirm. *502=Ring Transfer: On? or Enter the code. Press the trunk key you wish to use. Enter the number of the trunk you wish to use. Deactivating ring transfer: Press the "Ring Transfer" key. The LED goes out. or Press the key. The LED lights up. Program/Service Select and confirm. #502=Ring Transfer: Off? or Enter the code. Press the trunk key you wish to use. Enter the number of the trunk you wish to use.

Using Other Team Functions

Turning Group Call On and Off

If this function has been configured (contact System Support), you belong to one or more groups of users who can each be reached under a hunt group or group call number.

Incoming calls are signaled on all group member telephones in the order in which they are received (hunt group) or simultaneously (= group call) until one member of the group accepts the call.

You can also belong to a team (including executive/secretary ones) in which station numbers are programmed on trunk keys → page 78.

Each member of the group remains available under his or her own station number.

You can activate and deactivate the audible signal for a hunt group, group call or individual trunks in a group (including an executive/secretary team).

If the LED on a programmed "Hunt group join/leave" key → page 54 is illuminated, this means that the audible tone was activated for at least one group.

Special features must be taken into consideration if your telephone operates with HiPath AllServe (system networking via PC network)

page 90!

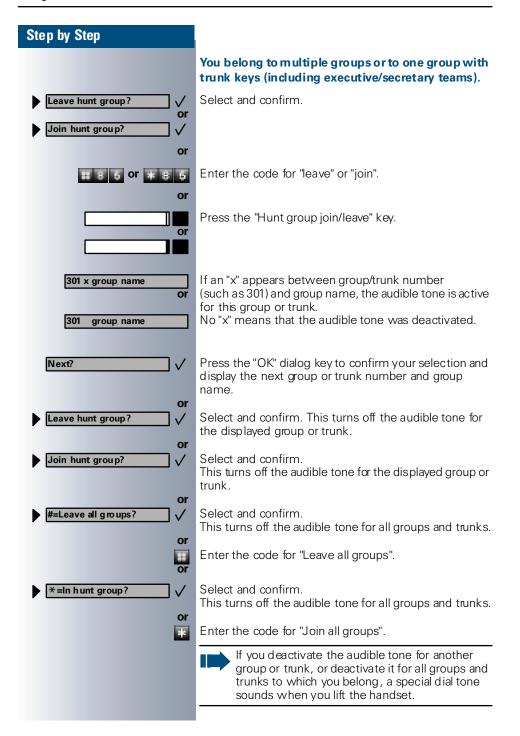

You belong to a hunt group or a group call:

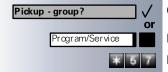

Enter the code for "leave" or "join".

Press the Hunt group join/leave key.

Accepting a Call for Another Member of Your Team

You can accept calls for other telephones in your team from your telephone even while engaged in another call. To do this, contact System Support to find out if a pickup group has been configured.

Precondition: You telephone rings briefly. The following message appears on the display: "Call for:".

Confirm.

Press the key. The LED lights up.

Enter the code.

Activating and Deactivating a Ringing Group

You can have calls for your telephone signaled audibly at up to five other internal phones. The person who answers first receives the call.

Special features must be taken into consideration if your telephone operates with HiPath AllServe (system networking via PC network)

page 93!

Saving, displaying, and deleting telephones for the ringing group:

Press the key. The LED lights up.

Select and confirm.

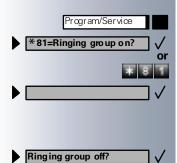

Enter the code.

Follow the display prompts (enter the internal station number).

Removing all telephones in call ringing group:

Select and confirm.

Enter the code.

Uniform Call Distribution (UCD)

If this function has been configured (contact System Support), you belong to a group of users (agents) to whom calls are distributed.

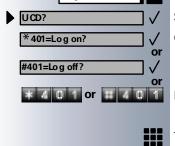

An incoming call is always assigned to the agent who has had the longest break without a call.

Logging on and off at the beginning and end of your shift:

Press the key. The LED lights up.

Select and confirm.

Confirm

Program/Service

Enter the code for "Log on" or "Log off".

To log on, enter your identification number ("Agent:"). Contact System Support to find out what it is.

Logging on and off during your shift:

Press the key. The LED lights up.

Select and confirm.

Confirm.

Enter the code for "Not available" or "Available".

Step by Step Program/Service UCD? *403=Work on? or #403=Work off? or 0 3 or # 4 Program/Service UCD? *404=UCD night on? or #404=UCD night off? or 0 4 or III Program/Service UCD? *405=Calls in queue? or

Requesting and activating a work time:

If you want to follow-up on the last call you answered without being disturbed, you can request and activate a work time. This removes your telephone from the call distribution cycle for a programmable period of time until you log back on.

Press the key. The LED lights up.

Select and confirm.

Confirm.

Enter the code for "on" or "off".

Turning the night service on and off for UCD:

Press the key. The LED lights up.

Select and confirm.

Confirm.

Enter the code for "on" or "off".

Display the number of waiting calls:

Press the key. The LED lights up.

Select and confirm.

Confirm.

Enter the code for "on" or "off".

Special Functions in the LAN (PC Network)

If your telephone is operating in a HiPath AllServe environment, multiple HiPath 3000 systems are interconnected via a LAN (Local Area Network, e.g. propriet ary PC network). Your telephone calls are conducted via the LAN (PC network).

If this is the case, you must take certain special features into consideration when performing various functions. These are described below.

Leaving a Hunt Group/Group Call

Precondition: you belong to a hunt group/group call → page 85 of another HiPath 3000:

Select and confirm.

Enter the code.

or

Enter the (DISA) call number of the other HiPath 3000.

Confirm the entry.

Enter the (DISA) call number of your telephone.

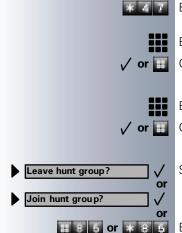

Confirm the entry.

Select and confirm.

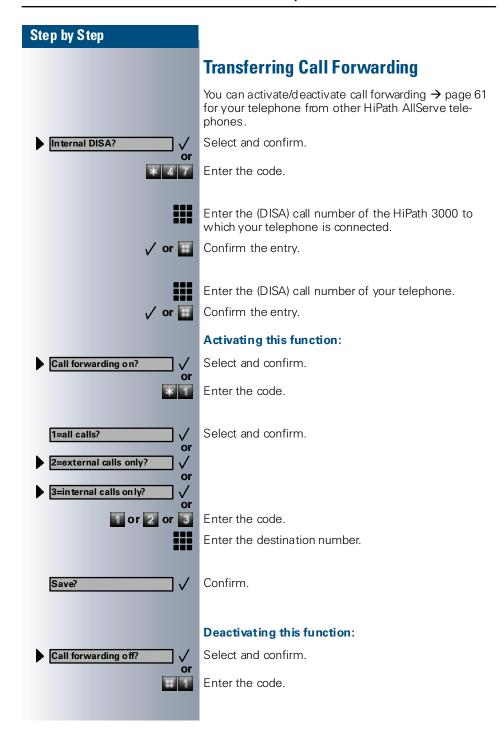

Enter the code for "leave" or "join".

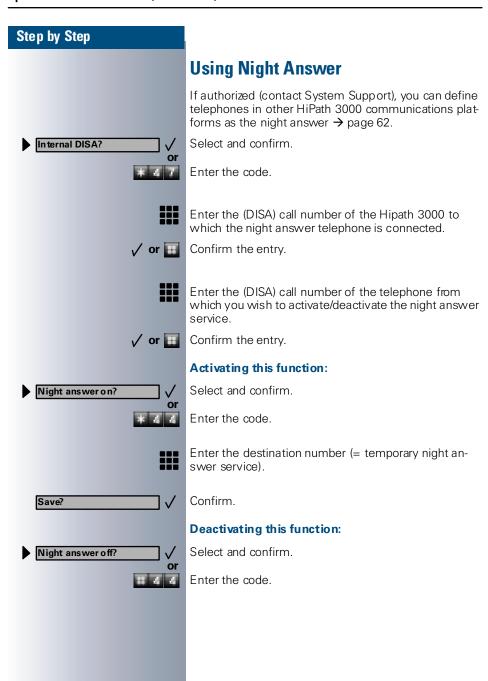

You belong to multiple groups of another HiPath 3000:

Enter the group number for "Join/Leave, directed".

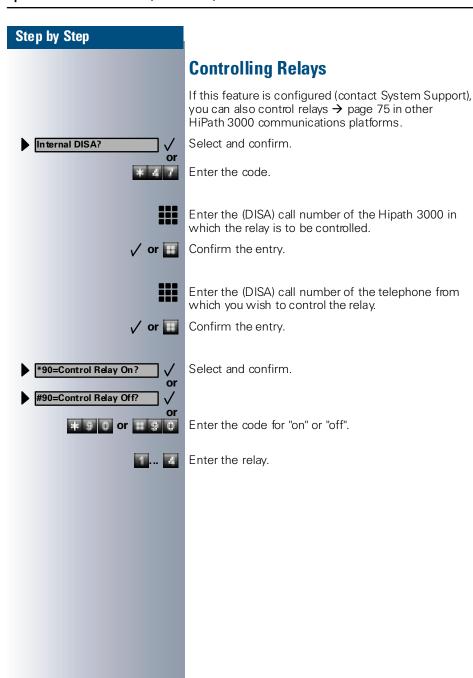

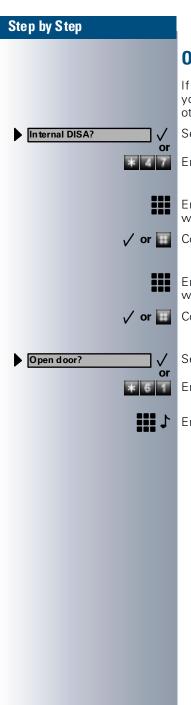

Internal DISA?

Step by Step **Activating and Deactivating a Ringing** Group You can have calls for your telephone signaled audibly at external telephones or at telephones in other HiPath 3000 communications platforms → page 87. Saving the telephones for the ringing group: Press the key. The LED lights up. Program/Service Select and confirm. *81=Ringng group on? or Enter the code. Select and confirm Add to ringing group? or Add another station? or Display remove? Select and confirm, then follow the operating instructions. Enter the call number. Confirm. #=Entry complete? or Enter Save? Confirm. Select and confirm. Exit? Removing all telephones in call ringing group: Select and confirm. Ringing group off? Enter the code.

Opening the Door

If this feature is configured (contact System Support), you can also activate the door opener → page 21 in other HiPath 3000 communications platforms.

Select and confirm.

Enter the code.

Enter the (DISA) call number of the HiPath 3000 in which the door is to be opened.

Confirm the entry.

Enter the (DISA) call number of the telephone from which you wish to activate the door opener.

Confirm the entry.

Select and confirm.

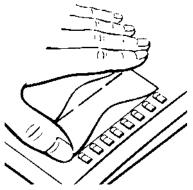

Enter the code.

Enter the call number of the entrance telephone.

Labeling, Documentation and Accessories

Labeling Key Fields

Key labeling sheets containing pre-cut cards are supplied with each telephone and key module in an accessory pack. These cards can be used on both sides, and are inserted into the telephone.

To label the fixed function keys → page 3, punch out the **small** preprinted labeling card. Insert the card and cover it with the plastic foil supplied (matt side up), as shown in the drawing.

Use one **large** card for labeling the programmable keys → page 3. Punch out the card, write down the stored functions and/or station numbers (in the white area), insert it, and cover it with the plastic foil supplied (matt side up), as shown in the drawing.

If you are using the "dual key assignment" function → page 52, use the back of the large card for labeling or assigning the two levels. Use the plastic foil with the narrow strips as a protective cover.

Labeling Key Fields Using the PC

If you have the user instructions for your HiPath 3000/HiPath AllServe on CD \rightarrow page 97, you can label keys conveniently at the PC.

Attaching a Station Number Label

A sheet with station number labels is supplied with each telephone.

Fill out the label (fire, police, your own station number) and punch it out. Lift the handset and attach the label in the recess of the telephone.

Ordering Operating Instructions (Not for U.S.)

Additional copies of these operating instructions can be ordered from the Siemens sales department:

- Printed copy in an accessory pack, order number A31003-M1550-B831-5-7619 (also available in other languages),
- On CD in HTML and PDF format, order number P31003-H1012-C130-*-6Z19 (7 languages included).

Contact system Support for information and ordering instructions.

Operating Instructions in the Internet

You can download these operating instructions as a file from the Internet: http://www.hipath.com

The operating instructions are available in PDF format. To read them, you need the Adobe Acrobat Reader, which is available free of charge.

To download files from the Internet you need a computer with Internet access and a Web browser such as Netscape Communicator or Microsoft Internet Explorer.

Ordering Accessories

The following accessories help you customize your telephone to your individual preferences:

optiset E key module:

Key module with programmable keys. You can connect up to four key modules to your telephone.

optiset E data adapter:

Connects a PC to the V.24 interface.

optiset E ISDN adapter:

Connects an ISDN device, such as an ISDN fax machine, video recorder or PC to the $\rm S_{\rm 0}$ interface.

optiset E privacy module:

Key module for encrypting voice signals in calls.

optiset E headset/headset plus adapter:

Connects a headset or tape recorder.

optiset E contact adapter (not for U.S.):

Provides an additional bell for signaling calls in loud environments and similar situations and controls illuminated display panels, such as "Please do not enter" at the entrance to a room

optiset E control adapter:

Connects a headset to a telephone with a PC link.

optiset E phone adapter:

Connects a second optiset E telephone. Callers can reach the second optiset E telephone under a separate station number.

optiset E analog adapter:

Connects an additional analog telephone, fax machine or PC with a modem card.

optiset E acoustic adapter (not for U.S.):

Connects a desk microphone, external speaker or second handset.

PNT E (not for U.S.):

A desktop unit (optionally available with PSU for power supply) for connecting up to $2\ S_0$ terminals (e.g. PC and FAX).

Headset:

Headset for frequent telephone users.

Desk microphone (not for U.S.):

For speakerphone mode under poor acoustic conditions.

External speaker (not for U.S.):

Improves the sound quality with open listening.

Second handset (not for U.S.):

Allows you to hear better in noisy environments.

BLF (Busy Lamp Field):

An add-on module with 90 LEDs and function keys. Use preferably in conjunction with optiPoint Attendant.

optiLog 4me (for me):

add-on module for digital voice recording.

You will find details about the individual products in the optiset E telephone data sheets.

Fixing Problems

Telephone Maintenance

- Always use a damp or antistatic cloth to clean the telephone. Never use a dry cloth.
- If the telephone is very dirty, clean it with a diluted neutral cleaner containing surfactants, such as a dish detergent. Afterwards remove all traces of the cleaner with a damp cloth (using water only).
- Never use cleaners containing alcohol, cleaners that corrode plastic, or abrasive powders.

Troubles hooting

Pressed key does not respond:

Check whether the key is stuck.

Telephone does not ring:

Check whether the do not disturb function was activated on your telephone (" Do not disturb" appears on the screen). If so, deactivate it → page 19.

You cannot dial an external number:

Check whether you telephone is locked ("US:Not authorized UK:Access denied" appears on the screen). If so, unlock the telephone \rightarrow page 50.

To correct any other problem:

First contact System Support. If System Support is unable to correct the problem, contact Customer Service.

US: Invalid entry

UK: Incorrect entry

US: Not authorized UK: Access denied

Responding to Error Messages on the Screen

Possible cause:

The station number is incorrect.

Possible response:

Enter a correct station number.

Possible cause:

You tried to activate a disabled function.

Possible response:

Ask System Support to authorize you to use the function.

US: Currently not possible

UK: Feature not available

Possible cause:

The station number you dialed does not exist. The telephone you are trying to call is unplugged.

Possible response:

Enter a correct station number. Try calling the telephone again later on.

US:Invalid station number

UK: Number cannot be dialed

Possible cause:

You dialed your own station number.

Possible response:

Enter a correct station number.

Possible cause: US: Key memory is full

UK: Max.no.of keys exceeded

All memory locations for external station numbers are currently in use.

Possible response:

Try again later on.

Contacts for Resolving Problems

If you encounter a problem that lasts longer than five minutes, contact System Support.
